There are various recognized methods for calculating the square footage of a unit. The square footage and dimensions stated herein are measured to the exterior boundaries of the exterior walls and the centerline of exterior opening walls and in fact vary from the dimensions that would be determined by using the description and definition of the "unit" set forth in the Declaration (which generally only includes the interior air space between the perimeter walls and excludes interior structural components). For your reference, the area of the unit, determined in accordance with those defined unit boundaries, is set forth in the Declaration. Note that measurements of areas set forth on this floor plan are generally taken at the greatest points of each given room, even if the room were a perfect rectangle, without regard for any alcove. Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length times width. The dimensions and square footage stated for this Unit floor plan are approximate and may vary with actual construction, and all floor plans and development plans are subject to change. All depictions of furnishings, appliances, built-ins, counters, soffits, floor coverings, lighting and other matters of detail, including, without limitation, items of finish and decoration, are conceptual only and are not necessarily included in each unit.
